

CSE221  
Lab Assignment - 03

Name: Md Intiaj Hossain

Id : 19201031

Sec : 02

NO ANSWER

### Time complexity of BFS (Task-2) Algorithm

adj list  $\rightarrow O(V+E)$

adj matrix  $\rightarrow O(V+E)$   
 for each node  $\searrow$  for each edge

### Time complexity of DFS (Task-3) Algorithm

adj list  $\rightarrow O(V+E)$

11 matrix  $\rightarrow \sigma(V+E)$

⇒ DFS gets the victory road first. If victory road connect with first node or second node then BFS gets the victory road first. Since it connect with the last and DFS goes to the depth first. That's why DFS gets first.
